**MAKING VALUE-BASED CARE WORK FOR EVERYONE**

Data trapped in a sea of third-party silos. Patchwork solutions that create more problems than they solve. Labor-intensive portals that drag physicians out of their workflows, creating disengagement.

When it's impossible to share data, we can't share insights, and we can't improve outcomes for populations or individual patients, much less lower costs and reduce risk. *So how will value-based care ever fulfill its promise for patients, providers, and health plans?*

**58%**

**OF PHYSICIANS** feel that value-based care only creates more work without benefitting patients.\*

**54%**

**OF HEALTH PLAN EXECUTIVES** believe the healthcare system does not have the tools to succeed in a value-based healthcare system.‡

‡ 2018 Quest Diagnostics Annual Study

Already used by thousands of providers across hundreds of locations, Holon CollaborNet is a point-of-care platform that empowers risk-bearing organizations to optimize patient outcomes and financial performance by surfacing actionable, patient-specific insights directly to and from the point of care, and seamlessly sharing clinical data with health plans.

Holon has reimaged interoperability to make the impossible, possible. We liberate data to liberate care, using a unique bi-directional delivery technology that puts the right information in front of the right people, at the right time.

# Holon CollaborNet

## BETTER PATIENT OUTCOMES, BETTER FINANCIAL PERFORMANCE

Holon connects what health plans need with what providers want: By surfacing actionable insights across disparate EHRs, right within the workflow, we can empower providers with patient-specific data at the point of care. Provider utilization and engagement can improve as burdens ease. And health plans can measure performance, receiving clinical data in return to lower costs, adjust risk, and improve outcomes.

Holon's sensor recognizes the patient in context and surfaces real-time, pertinent, insights directly within the workflow at the point of care.

### INSIGHTS

Surface actionable insights at the point of care.

### CONNECT

Automatically share clinical data back to health plans and vendors.

### REFERRALS

Facilitates electronic collaboration across health communities.

## GET THE RIGHT DATA IN FRONT OF THE RIGHT PEOPLE, AT THE RIGHT TIME

The Banner/Aetna joint venture is focused on creating better experiences, lower costs, and improved patient outcomes for one of the largest Accountable Care Organizations in the United States. They selected Holon to help activate their population health management solution, by surfacing by surfacing contextual insights across many different EHRs, and by automatically retrieving clinical data from their affiliated providers.

*"Holon's capabilities to work across numerous EMRs to alert at the point of care, combined with their ability to seamlessly retrieve the data we need for our population health efforts moves our network ahead light-years in terms of community interoperability. Combining this functionality means that we have a more complete patient data to analyze, so we can see opportunities to refine care delivery or coding, thereby lowering costs for employers and members, and improving patient outcomes.."*

—Ryan Smith, CIO & SVP Information Technology, Banner/Aetna
