

The title "Holon CollaborNet" is written in a large, white, sans-serif font, with a trademark symbol (TM) at the end.The tagline "SURFACING INSIGHTS, EMPOWERING PROVIDERS" is written in a bold, white, uppercase, sans-serif font.

Data trapped in silos. Patchwork solutions that create more problems than they solve. Labor-intensive portals that drag physicians out of their workflows, creating disengagement.

When it's impossible to share data, we can't share insights, and we can't improve outcomes for populations or individual patients. *So how will value-based care ever fulfill its promise?*

**58%**

**OF PROVIDERS** feel that value-based care only creates more work without benefitting patients.\*

\* Humana and AAFP 2017 Value-Based Payment Survey

**37%**

**OF TREATMENT TIME** is already spent working in the EHR instead of providing care.†

† Sinsky, Colliga, et al, Annals of Internal Medicine, December 2016

**72%**

**OF DOCTORS** don't have all the information they need about their patients.‡

‡ 2018 Quest Diagnostics Annual Study

Already used by thousands of providers across hundreds of locations, Holon CollaborNet is a point-of-care platform that empowers risk-bearing organizations to optimize patient outcomes and financial performance by surfacing actionable, patient-specific insights directly to and from the point of care. Through its innovative technology, Holon is removing administrative burden from clinicians, allowing them to focus on what matters most.

Holon has reimagined interoperability to make the impossible, possible. We liberate data to liberate care, using a unique bi-directional delivery technology that puts the right information in front of the right people, at the right time.

# Holon CollaborNet

## BETTER PATIENT OUTCOMES, BETTER FINANCIAL PERFORMANCE

Holon CollaborNet creates closer alignment between providers and payers, enabling better patient outcomes and better financial performance by surfacing insights to and from the point of care.

Holon's sensor recognizes the patient in context and surfaces real-time, pertinent, insights directly within the workflow at the point of care.

### INSIGHTS

Surface actionable insights at the point of care.

### CONNECT

Automatically share clinical data back to payers and vendors.

### REFERRALS

Facilitates electronic collaboration across health communities.

## GET THE RIGHT DATA IN FRONT OF THE RIGHT PEOPLE, AT THE RIGHT TIME

The Banner/Aetna joint venture is focused on creating better experiences, lower costs, and improved patient outcomes for one of the largest Accountable Care Organizations in the United States. They selected Holon to help activate their population health management solution, by surfacing contextual insights across many different EHRs, and by automatically retrieving clinical data from their affiliated providers.

*"Holon's capabilities to work across numerous EMRs to alert at the point of care, combined with their ability to seamlessly retrieve the data we need for our population health efforts moves our network ahead light-years in terms of community interoperability. Combining this functionality means that we have a more complete patient data to analyze, so we can see opportunities to refine care delivery or coding, thereby lowering costs for employers and members, and improving patient outcomes."*

—Ryan Smith, CIO & SVP Information Technology, Banner/Aetna
