

Holon CollaborNet™

CONNECTING CUSTOMERS, EMPOWERING VENDORS

How do you get the data where it needs to be? How do you help health systems communicate across so many different EHRs? How do you make interoperability real? And in such a crowded marketplace, how do you stand out as a healthcare technology vendor? How do you create more value for your customers? And how can you help providers achieve more utilization without burdening clinicians?

8%

OF POPULATION HEALTH CUSTOMERS are satisfied with their clinical engagement.*

* KLAS Population Health Management Report, 2017

86%

OF PROVIDERS don't achieve meaningful levels of interoperability when sharing data with disparate EHRs.†

† KLAS 2017 Interoperability Report

72%

OF DOCTORS don't have all the information they need about their patients.‡

‡ 2018 Quest Diagnostics Annual Study

Already used by thousands of providers across hundreds of locations, Holon CollaborNet is a point-of-care platform that empowers risk-bearing organizations to optimize patient outcomes and financial performance by surfacing actionable, patient-specific insights at the point of care.

Holon has reimagined interoperability to make the impossible, possible. We liberate data to liberate care, using a unique bi-directional delivery technology that puts the right information in front of the right people, at the right time.

Holon CollaborNet

GET THE RIGHT DATA, IN FRONT OF THE RIGHT PEOPLE, AT THE RIGHT TIME

Holon is not an analytics, EHR, or interface provider, but a silent partner that helps you unite people, systems, data, and applications, and enhance care while increasing provider engagement and utilization. By surfacing actionable insights over any EHR wall, within the workflow, Holon makes value-based care work for everyone: providers, health plans, and vendors.

INSIGHTS

Surface actionable insights at the point of care.

CONNECT

Automatically share clinical data back to payers and vendors.

REFERRALS

Facilitates electronic collaboration across health communities.

CREATE VALUE, STAND ABOVE

The Banner/Aetna joint venture is focused on creating better experiences, lower costs, and improved patient outcomes for one of the largest Accountable Care Organizations in the United States. They selected Holon to help activate their population health management solution, by surfacing contextual insights across many different EHRs, and by automatically retrieving clinical data from their affiliated providers.

"Holon's capabilities to work across numerous EMRs to alert at the point of care, combined with their ability to seamlessly retrieve the data we need for our population health efforts moves our network ahead light-years in terms of community interoperability. Combining this functionality means that we have a more complete patient data to analyze, so we can see opportunities to refine care delivery or coding, thereby lowering costs for employers and members, and improving patient outcomes."

—Ryan Smith, CIO & SVP Information Technology, Banner/Aetna
